

Smart Proxy - Feature #15874

Log X-Request-ID by default

07/28/2016 05:41 AM - Dominic Cleal

Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/smart-proxy/pull/475	
Description	
The default log configuration of the smart proxy should log the contents of the X-Request-ID header if it's set, which will help debugging as Foreman (or other users) can set it when making requests. This will make it easier to search logs for relevant entries. Foreman does something similar (but with the session ID) since #15863 .

- Has duplicate Feature #15877: Print session/request id in foreman-proxy logs added

#3 - 07/28/2016 07:53 AM - Lukas Zapletal

Make sure this gets recorded in structured format in logger buffer as well, so we can easily pull out logs (e.g. errors) via the API and show them.
