

Foreman - Bug #15975

subnets/_fields partial depends on @subnet instance variable

08/04/2016 04:29 AM - Dominic Cleal

Status:	Closed	
Priority:	Normal	
Assignee:	Dominic Cleal	
Category:	Rails	
Target version:	1.13.0	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases: Nightly
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/3702	

Description

The subnets/_fields partial has a reference to the @subnet instance variable which makes it harder to reuse the partial in a nested form from a plugin (foreman_setup). Using f.object to refer to the object being rendered is more robust as it doesn't assume how the controller works.

This fixes the following error rendering the form in foreman_setup:

```
ActionView::Template::Error: undefined method `type' for nil:NilClass
  app/views/subnets/_fields.html.erb:10:in `__app_views_subnets__fields_html_erb__172584428900089411_67260780'
