Foreman - Feature #16032

Maintain physical copy of provisioning scripts for version control

Description

Currently, I do not see of a way to maintain the provisioning scripts in a VCS. It would be nice if there was a physical copy of the script in the foreman instance, so that directory and corresponding files, could be used with git an version control.

- Category changed from Unattended installations to Templates

The foreman_templates plugin can also sync from a git repository into Foreman.
