

Foreman - Bug #16043

Unable to select all hosts from the GUI

08/10/2016 06:47 AM - Daniel Lobato Garcia

Status: Closed	
Priority: Normal	
Assignee: Amir Fefer	
Category: Web Interface	
Target version: 1.15.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1282558	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/4338	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1282558	
Description of problem:	
<p>I have changed the hosts per page option to 50 but when searching for lots of hosts for group editing I still cannot select > 50 hosts at a time. There should be a way to select ALL matching hosts from any page for bulk editing. This becomes very tedious to edit lots of hosts especially when I have multiple thousands of hosts to edit. (e.g. put them into build mode or change their location)</p> <p>There is also no easy way to do this via hammer. The only way I could find to do it was to use hammer to search for the hosts I wanted, save that information to a file, and then loop through the file and run hammer update commands on each one.</p>	
Version-Release number of selected component (if applicable):	
Satellite 6.1.3	
How reproducible:	
always
