Description

This is inline with various other models, to ensure any url-unsafe characters are properly escaped for the web ui.

Revision a763e976 - 08/17/2016 12:12 PM - Tomer Brisker

Fixes #16104 - Use parameterizable for HW models

Correctly escape HW model names that may contain url-unsafe characters.
Also removed unnecessary truncation of the model name.

Resource finder now works correctly for models that may contain either a
friendly name or a parameterized id-name.
