

Installer - Bug #16148

Enable/disable module descriptions in help output are confusing

08/17/2016 09:10 AM - Shlomi Zadok

Status: Closed	
Priority: Normal	
Assignee: Marek Hulán	
Category: Foreman modules	
Target version: 1.15.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1329375	Red Hat JIRA:
Pull request: https://github.com/theforeman/puppet-for-eman_proxy/pull/319	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1329375	
Description of problem:	
The description for the below options is not right and is confusing.	
<pre>~]# foreman-installer --help grep i-seap -[no-]enable-foreman-plugin-openscap Enable 'foreman_plugin_openscap' puppet module (default: true) --[no-]enable-foreman-proxy-plugin-openscap Enable 'foreman_proxy_plugin_openscap' puppet module (default: true) --foreman-proxy-plugin-openscap-enabled enables/disables the plugin (default: true)</pre>	
Also if "--[no-]enable-foreman-plugin-openscap" configures the sat6 side stuff and "--[no-]enable-foreman-proxy-plugin-openscap" configures the capsule side stuff then the description for "--foreman-proxy-plugin-openscap-enabled" as "enables/disables the plugin " is not at all clear.	
This needs to be updated to bring in more clarity.	
Version-Release number of selected component (if applicable): sat62-snap9.0	
How reproducible:	
Steps to Reproduce:	
1. 2. 3.	
Actual results:	
Currently the description for <code>{no}enable-foreman-plugin-openscap</code> and <code>{no}enable-foreman-proxy-plugin-openscap</code> , uses the words "puppet module" which is incorrect.	
Also the requirement/purpose of this <code>--foreman-proxy-plugin-openscap-enabled</code> is not clear.	
Expected results:	
The description is not clear and needs more detail, something like	
<pre>--[no-]enable-foreman-plugin-openscap Installs and configures the packages required for Satellite6 --[no-]enable-foreman-proxy-plugin-openscap Installs and configures the packages required for Capsules --foreman-proxy-plugin-openscap-enabled "< exact description>"</pre>

#2 - 08/19/2016 06:34 AM - Marek Hulán

- Project changed from *Installer* to *Kafo*
- Subject changed from *foreman-installer descriptions for oscap is incorrect* to *Module descriptions in help output are confusing*

Note that this is not related to openscap and is common for all puppet modules we have in our installer. I've asked reporter for possible alternatives but it's very likely a change that would have to be made in kafo and based on solution also maybe in foreman-installer. Moving this to kafo and will create a new issue if it's required in installer.
