Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3759	
Description	
<p>The documentation in the users API controller lists possible values for timezones by calling ActiveSupport::TimeZone.zones_map, however this method is private in Rails 5.0:</p> <pre>MethodError: private method `zones_map' called for ActiveSupport::TimeZone:Class /home/dcleal/code/foreman/foreman/app/controllers/api/v2/users_controller.rb:50:in `block (2 levels) in <class:UsersController>'</pre> <p>It should be replaced by a method that remains public.</p> <p>Note the same list is obtained by the time_zone_select form helper, which lists timezones through .all.</p>
