Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman-selinux/pull/60	
Description		
<p>foreman-selinux contains a Rakefile for generating the tarball via the pkg:generate_source task, which is used across all Foreman projects to build nightly and release tarballs.</p> <p>The build jobs on Jenkins have started failing as we're not longer installing rake by default (because we prefer RVM for slaves), so this repo should also contain a Gemfile that helps install the rake gem to run the rake task.</p>
