

Foreman - Bug #16617

Duplicate filters can be created

09/20/2016 07:26 AM - Ohad Levy

Status: Needs design	
Priority: Normal	
Assignee:	
Category: Users, Roles and Permissions	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description Currently, there is no limitation, and multiple filters can be created for the same role (see attached image).

Not sure this is really a bug, filters are additive.

I can't see the reason why you would be able to create the exact same filter twice?

#4 - 09/20/2016 08:25 AM - Marek Hulán

- Status changed from New to Need more information

I don't think this should be considered as bug either. I think it would only introduce confusion why some filter can't be saved. Validation would have to be scoped per role so in the end user could still get 2 or more same filters from different roles. Is there some big advantage of enforcing uniqueness? Note that it would involve same permission set, same search condition, same override value and same taxonomies association checks.

#6 - 12/06/2016 08:46 AM - Lukas Zapletal

- Subject changed from duplicate filters can be created to Duplicate filters can be created

I offer an alternative solution, how about a button (or a rake task but that will be too hidden for users) that will simply remove dupes? I also think filters not being saved might be confusing experience so a way to clean things up might be a good option.

I agree with Lukas, "deduplicate" button might be useful even though I don't see many of duplicates. There used to be a bug that plugins were duplicating filters on every seed run but that's fixed for some time.
