Description

As epel rpm location keeps changing, it makes little sense to keep it in foreman code vs. a simple snippet.

we'll provide a snippet that is functional equivalent, however the older lagecy code will remain for the time being.

Revision 0f6ea5a2 - 06/04/2012 07:52 AM - Ohad Levy

fixes #1669 - epel is now a snippet.

This adds another method to install the epel repo, as a snippet,
allowing users to customly change the url, in case that it doesn't fit
their needs or if the url changes again.

to use, simple use:

<%= snippet "epel" %>
