<b>Pull request:</b>	
<b>Description</b>	
<p>When a host is provisioned from Foreman, the "Operating System" and "Model" columns are not getting updated properly. The "Operating System" column does get populated, but will not change if the host's operating system changes (6.0 -&gt; 6.2, etc). The "Model" column is never populated when a host is provisioned with Foreman.</p> <p>Both of these fields function normally when the host is not provisioned using Foreman.</p> <p>This is in 0.5.1-5 (RPM).</p>
