

Foreman - Bug #1672

included classes minus drops to next line if class name too long

06/06/2012 01:09 PM - Len Rugen

Pull request:	
Description	
I created a new class with a name longer than others, I noticed in the included classes area, that it didn't have a trailing minus sign, but the line below had 2. Clicking the 2nd minus on the line below deletes the class on the line above. See attached image.	

History

#1 - 06/07/2012 03:18 AM - Ohad Levy

- Project changed from *Installer* to *Foreman*

#2 - 06/07/2012 03:18 AM - Ohad Levy

- Assignee set to *Amos Benari*

Amos, was this already fixed in 0.5?

#3 - 06/28/2012 07:39 AM - Amos Benari

- Status changed from *New* to *Closed*

puppet classes now have more space to display and are truncated if they are long. Because of the new fluid design in some screens sizes (tablet) it may happen.
