Foreman - Bug #16806

foreman_url template macro can't be used outside controller context

10/05/2016 08:23 AM - Marek Hulán

Pull request:	https://github.com/theforeman/foreman/pull/3919		

Description

When foreman_url is used in a template which is rendered out of controller context it fails with url_for. I'm afraid it's not reproducible with pure Foreman atm but the Renderer should include url helpers so once it's included, all it's macros can be used. The issue is easily reproducible from remote execution plugin, when foreman_url is put in job template and then previewed.
