

Foreman - Bug #1695

Actions of non-sysadmin users not always audited.

06/20/2012 03:11 PM - Roger Spencer

Status: Resolved	
Priority: Normal	
Assignee:	
Category: Audit Log	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Foreman version 0.5	
Granted non-sysadmin users rights to edit parameters of hosts they manage. Their actions in changing parameters are not always logged to the Audits section.	
What does get logged:	
- Adding new parameters	
What doesn't get logged:	
- Changing an existing parameter's value	
- Deleting a parameter

we've just merged a pretty big change to the auditing code, can you confirm that its still broken after the changes we added?

thanks!

#2 - 06/21/2012 11:48 AM - Roger Spencer

Just updated and it did fix the issue. Even past events that were not showing are there now.

Thanks.
