Revision 9c0e127b - 05/17/2010 07:03 AM - Paul Kelly

Fixes #170 - implement usergroups

Added migration
Added tests
Added MVC files
Added the routes as well
Added the program logic and additional views
Added RESTful actions for update and create
Added validations to ensure that usergroup.name and user.login do not collide
Added "recipients" method to users and usergroups. This returns a list of addresses.
Usergroup#recipients will follow all nested usergroups avoiding any loops and return only unique addresses

Fixes #73 - Add usergroup support to hosts

Fixes #244 - Remove ActiveScaffold from the usergroup pages

and finally - added owners to host edit page and other whitespaces and mods by ohad

Revision 8b62e7f3 - 05/17/2010 08:24 AM - Ohad Levy

fixes typo in migration, refs #170

History

#1 - 03/03/2010 01:04 PM - Paul Kelly

- Status changed from New to Ready For Testing

This has been implemented in feature/73 on my github against the current edge. This includes the migration, MVC and tests. It is ready to be used by any model that wishes to use usergroups.
It uses has_many polymorphs and integrates with ActiveScaffold for error returns.

#2 - 03/03/2010 02:24 PM - Ohad Levy

the code looks great :)

Did you create a new feature because you didnt implement the host part?

can you switch the git submodule to .git?

please rebase to have one commit which closes the ticket ;)

thanks
