

Foreman - Bug #1700

Large audit log takes a long time to pull up. (25 secs+)

06/21/2012 02:51 PM - Brian Gupta

Status: Closed	
Priority: Normal	
Assignee: Amos Benari	
Category: Audit Log	
Target version: 1.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description Need to set to debug, and see which query is taking a long time.	

Associated revisions

Revision de3fb0d7 - 06/26/2012 08:22 AM - Amos Benari

fixes #1700 audit page performance improved

- Added auditabile name and associated name columns.
- Added username to audit table

Revision e2217aa6 - 06/26/2012 09:12 AM - Ohad Levy

minor fixing to audits search link, closes #1700

Revision a3b62913 - 06/27/2012 06:46 AM - Ohad Levy

ensure that migration script is a bit more robust for audit uses, refs #1700

(sadly the audited gem alias the .user method, and sometime returns strings and other times return a user object)

Performance is a lot better, but I may have discovered a regression.

I'm not 100% sure if it's related, but now searching the audit history by user seems to be broken, and it was (Largely) working a couple days ago.

Mmmm. Testing further indicated that for example if my username is bgupta and my display name is "Brian Gupta", if I click on a name in the audit list, it searches for the display name, which doesn't work, but if I manually type in my login name (bgupta) into the search it works. Searching for the Admin user audit still seems broken.

#5 - 06/26/2012 08:51 AM - Ohad Levy

- Status changed from Closed to Assigned

- Target version set to 1.0
