

Foreman - Bug #171

Error when adding parameters to a new "Host Group"

03/04/2010 09:49 AM - Marcello de Sousa

Status: Closed	
Priority: Low	
Assignee: Paul Kelly	
Category: Web Interface	
Target version: 0.1-5	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description Not a big deal but, when I create a new "Host Group" ("Puppet Group" menu item in the settings), if I immediately try to add parameters I get an error. Example: <pre>2 errors prohibited this hostgroup from being saved There were problems with the following fields: * Group parameters is invalid * Group parameters is invalid</pre>	
Workaround: First create the group without any parameters and click CREATE. Then re-open it for editing and only then add/create the parameters.	
Related issues: Is duplicate of Foreman - Refactor #200: Remove activescaffold from the puppe... Closed 04/07/2010	

History

#1 - 03/04/2010 09:52 AM - Marcello de Sousa

Btw, on the parameter field I see the following error:

```
1 error prohibited this groupparameter from being saved
There were problems with the following fields:
  * Hostgroup can't be blank
```

#2 - 03/04/2010 12:04 PM - Ohad Levy

- Target version deleted (0.1-4)

I know.

The whole edit page of hosts classes etc is undergoing a change now (in the NO_AS branch), this will also fix this issue.

#3 - 03/08/2010 07:09 AM - Ohad Levy

- Target version set to 0.1-5

#4 - 03/18/2010 10:23 AM - Paul Kelly

- Status changed from New to Ready For Testing

- Assignee changed from Ohad Levy to Paul Kelly

A fix for this bug can be found on branch bug/171 on my github

#5 - 04/14/2010 04:18 AM - Ohad Levy

- Status changed from Ready For Testing to Closed
