Foreman - Bug #1710

Hosts json index function returns too much

06/26/2012 01:04 PM - Corey Osman

Pull request:			

Description

I thought I had fixed this in an earlier version but somehow the hosts index function returns way too much information especially when returning data to a mobile device.

Its supposed to just return this:

:name, :id, :hostgroup_id, :operatingsystem_id

but currently we get this.
