| <b>Description</b>   |                           |
| <p>Dear ALL,</p> <p>how was the problem discribed in this post -&gt; <a href="http://theforeman.org/issues/1498">http://theforeman.org/issues/1498</a> solved?<br/>My pxe default is looking like this</p> <pre>default linux label linux kernel &lt;%= @kernel &gt; append vga=788 initrd=&lt;= @initrd &gt; install auto=true priority=critical edd=off preseed/url=http://xxxx.xxx.xxx/unattended/provision?spoo=&lt;= ip %&gt; --</pre> <p>This is really working fine as long as i disable login.</p> <p>For my understanding i thought changing it to</p> <pre>default linux label linux kernel &lt;%= @kernel &gt; append vga=788 initrd=&lt;= @initrd %&gt; install auto=true priority=critical edd=off preseed/url=http://xxxx.xxx.xxx/unattended/provision --</pre> <p>would solve my problem. But it didn't ...</p> <p>Where is my error in reasoning?<br/>It would be nice if someone can help me.</p> <p>Regards,</p> <p>Daniel</p> |                           |

#### Associated revisions

##### Revision 81159d4b - 10/04/2012 11:14 AM - Greg Sutcliffe

Use tokens for discovery of host identity during installation

- fixes #1069
- fixes #1720
- refs #969

#### History

##### #1 - 06/29/2012 09:00 AM - Daniel Verniers

Problem is solved after reading -> /usr/share/foreman/app/controllers/unattended\_controller.rb

Know everything is clear - after removing the spoo option - NATTING was my problem ...

Regards,  
Daniel
