<b>Description</b>			
Hello,			
I saw this on production.log:			
<pre>2016-11-08 14:10:52 92eac1ed [sql] [D] SQL (1.0ms) INSERT INTO "logs" ("message_id", "source_id", "report_id", "level_id", "created_at", "updated_at") VALUES (\$1, \$2, \$3, \$4, \$5, \$6) RETURNING "id" [{"message_id", 16056395}, {"source_id", 2}, {"report_id", 232689215}, {"level_id", 4}, {"created_at", "2016-11-08 13:10:52.062919"}, {"updated_at", "2016-11-08 13:10:52.062919"}] 2016-11-08 14:10:52 92eac1ed [sql] [D] (0.1ms) ROLLBACK 2016-11-08 14:10:52 92eac1ed [app] [W] Action failed   PG::Error: ERROR: integer out of range ...</pre>			
And checking the database, I've run out IDs in logs table:			
<pre>foreman=# insert into logs (message_id, source_id, report_id, level_id, created_at, updated_at) values (16056395, 2, 232689215, 4, '2016-11-08 13:10:52.062919', '2016-11-08 13:10:52.062919'); ERROR: integer out of range  foreman=# select max(id) from logs; max ----- 2147483647 (1 row)</pre>			
Can we increase id column from integer to bigint?			
Thanks.
