<b>Description</b>		
Hi Team,		
I would like to explain my senario,		
I do not have the dhcp in our environment.		
I am trying to install the VM with the autoyast, with the boot image available at : nfs://10.4.198.192/kick/SLES11		
and i would like to accomidate the boot options as below during the VM boot from the operation system configured on foreman.		
boot options are:		
install=nfs://10.4.198.192/kick/SLES11 hostip=10.4.40.227 netdevice=eth0 netmask=255.255.255.0 gateway=10.4.40.1		
autoyast=nfs://kick/SP3/autoyast.xml		
I am attaching the screenshot, this method is successfull when i tried manually without foreman.. i would like to know how this could be accomidated by foreman.		
regard,		
Vikram		

History

- #1 - 11/09/2016 03:23 AM - Anonymous
- Project changed from Discovery to Foreman
  - Category changed from Image to Unattended installations
  - Status changed from New to Closed
  - Priority changed from Urgent to Normal
  - Assignee changed from Aleksandr Orlov to Anonymous

NFS is not supported. Also, support for SUSE based distributions is only best effort from the community.
