<b>Description</b> This would be very usefull to improve inherited parameters display :  In host => display from what os / hostgroup / etc is the parameter inherited  In hostgroup => display the inherited parameters from nested hostgroup	

#### History

---

##### #1 - 10/21/2012 07:56 AM - Amos Benari

- % Done changed from 0 to 50

the first part is done:

In host => display from what os / hostgroup / etc is the parameter inherited.

##### #2 - 11/14/2012 11:57 AM - Romain Vrignaud

For now we can see if a parameter is inherited from hostgroup. It would be awesome to know from which hostgroup the parameter is inherited (last nested hostgroup which define / override this parameter).
