Mario, could you check if this is a duplicate of #17152 by appying the diff of
https://patch-diff.githubusercontent.com/raw/theforeman/foreman/pull/3980.patch ?

i just reboot the machine and the patch works just now i have in the log a warning that the address is already in use i don't which one is talking about

#4 - 11/12/2016 10:03 AM - Anonymous

- Project changed from Katello to Foreman

- Category set to Dashboard

- Status changed from New to Duplicate

- translation missing: en.field_release deleted (162)

OK, the core patch solves this issue then, htanks for reporting back! When testing patches, please always restart the service in question.
The "address already in use" is generated on the proxy side and I'm unsure if that's really an error. To find out you could set the loglevel on the proxy to DEBUG, restart it and analyze it further. If there's a real bug, open a new issue.
