

Foreman - Bug #1741

Test cannot be run in the standard way

07/10/2012 07:40 AM - Greg Sutcliffe

Status: Resolved	
Priority: Normal	
Assignee:

Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Tests are currently unable to be run without extra options:	
<pre>root@testvm-gss:~/foreman# RAILS_ENV=test bundle exec rake db:migrate (in /root/foreman) rake aborted! Test::Unit or MiniTest must be loaded *before* Mocha (use MOCHA_OPTIONS=skip_inte gration if you know what you are doing). /root/foreman/Rakefile:1:in `require' (See full trace by running task with --trace) root@testvm-gss:~/foreman# RAILS_ENV=test bundle exec rake test (in /root/foreman) rake aborted! Test::Unit or MiniTest must be loaded *before* Mocha (use MOCHA_OPTIONS=skip_inte gration if you know what you are doing). /root/foreman/Rakefile:1:in `require' (See full trace by running task with --trace)</pre>	
If you add the option specified, it seems ok (but no idea what other things it will break):	
<pre>MOCHA_OPTIONS=skip_inte gration RAILS_ENV=test bundle exec rake test [test results]</pre>	

History
