

Foreman - Bug #17438

Import IPv4 Subnets page has IPv4/IPv6 Radio button enabled

11/22/2016 03:53 AM - Ohad Levy

Status: Closed	
Priority: Normal	
Assignee: Shlomi Zadok	
Category: Web Interface	
Target version: 1.14.1	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1378493	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/4161	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1378493	
Description of problem: In 1.13 support was added for IPv6 subnets and the "Import subnets" option for a capsule was changed to "Import IPv4 subnets". From my understanding, we are not supporting importing IPv6 subnets at this time However the page it displays (see attached screen shot) still has a radio button for IPv4/IPv6	
Version-Release number of selected component (if applicable):	
How reproducible: Happens all the time	
Steps to Reproduce: 1. Go to Infrastructure -> Smart Proxies 2. Under actions select "Import IPv4 subnets"	
Actual results: A radio button for IPv4/IPv6 appears and can be toggled.	
Expected results: The radio button should not appear, or be disabled so it can be toggled.
