

Foreman - Bug #17457

multiple_checkboxes doesn't work with orgs/locs

11/23/2016 04:29 AM - Daniel Lobato Garcia

Status: Closed	
Priority: Normal	
Assignee: Daniel Lobato Garcia	
Category: Organizations and Locations	
Target version: 1.14.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/4039	
Description	
<p>multiple_checkboxes calls <code>ActiveModel::Naming</code> on associations that could be simply "Taxonomy". This results on a 500 error 'undefined method `taxonomies' for #<Filter:0x005593624bdd18>' (or whatever other class has the problem). Simply trying to edit a filter will throw this 500 error.</p> <p>https://github.com/foreman/foreman/blob/develop/app/helpers/form_helper.rb#L49</p> <p>We've always had this problem , but since #16971 removed the check for only using that method for '> 5' associations, you'd only see the error if you had at least 6 organizations or locations (unlikely). Now it became more apparent and it shows up every time.</p>

Revision 46ab6100 - 01/03/2017 08:47 AM - Daniel Lobato Garcia

Fixes #17457 - multiple_checkboxes doesn't work with orgs/locs

multiple_checkboxes calls `ActiveModel::Naming` on associations that could be simply "Taxonomy". This results on a 500 error 'undefined method `taxonomies' for #<Filter:0x005593624bdd18>' (or whatever other class has the problem). Simply trying to edit a filter will throw this 500 error.

We've always had this problem , but since [#16971](#) removed the check for only using that method for '> 5' associations, you'd only see the error if you had at least 6 organizations or locations (unlikely). Now it became more apparent and it shows up every time.

The fix I've used is just to take advantage of the options hash to send the association name directly, and if it's not set, then use `ActiveModel::Naming` to get it (as usual).
