Description

After clean installation of K 3.2 I got this in my inbox:

```
/etc/cron.daily/logrotate:
```

```
error: error opening /var/log/candlepin/cpdb.log: Permission denied
```

Here is the permissions:

```
[root@nuc ~]# ll /var/log/candlepin/cpdb.log
-rw-r--r--. 1 root root 28 23. lis 16.32 /var/log/candlepin/cpdb.log
```

SELinux in permissive, no relevant denials there.

History

#1 - 01/19/2017 11:29 AM - Justin Sherrill

- Category set to Installer

- translation missing: en.field_release changed from 162 to 114

#2 - 08/09/2023 01:58 PM - Ewoud Kohl van Wijngaarden

- Project changed from Katello to Packaging

- Category changed from Installer to RPMs

- Target version deleted (Katello Backlog)

- Triaged set to No

Moving to packaging since packaging ships the logrotate bits.
