

Foreman - Bug #1753

Showing a modal from an AJAX request that returns a full-blown HTML page clears the page

07/16/2012 05:36 AM - Olivier Favre

Status: Closed	
Priority: Normal

Pull request:	
Description	
How to reproduce:	
Edit a host, get a conflict: this displays an error info in a modal dialog. Ack then overwrite: it should have shown another error info in a modal dialog too, but instead of an HTML fragment, foreman gave a full HTML page (with html, head and body) as an answer to some AJAX query, this has the nasty effect of clearing the page, only showing "2012".	
Clue:	
<pre>\$.ajax({ [...], success: function(result) { # If result is an HTML fragment, everything is fine # if it is a full HTML page, this will somehow clear the page and show "2012".. \$('#modal-frame-content').html(result); } });</pre>	
This is a general problem that can arise with code like the above.

fixes #1753 - Showing a modal from an AJAX request that returns a full-blown HTML page clears the page

History

#1 - 07/16/2012 06:59 AM - Ohad Levy

can you provide the logs from foreman while doing the request?

#2 - 07/17/2012 05:09 AM - Romain Vrignaud

- Priority changed from High to Normal

#3 - 07/17/2012 07:23 AM - Ohad Levy

this seems to happen only when the response is 404.

and I'm guessing its related to when renaming a host.
