

Foreman - Bug #1755

Foreman with postgre doesn't allow wide URLs for installation meda

07/16/2012 11:00 AM - Jaroslav Henner

Status: Resolved	
Priority: Normal	
Assignee: Joseph Magen	
Category: DB migrations	
Target version: 1.1	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
PG::Error: ERROR: value too long for type character varying(100) : INSERT INTO "media" ("os_family", "config_path", "created_at", "updated_at", "name", "image_path", "media_path", "path") VALUES ('Redhat', '', '2012-07-16 12:36:15.489468', '2012-07-16 12:36:15.489468', 'RHEL', '', '', 'http://loong.paattthh.at.corp.com/pub/rhel/foo/baaar/\$major.\$minor/Server/\$arch/os/') RETURNING "id"	
It got fixed after making media.path varying(200). I think more than 200 should be allowed though.
