Description

Time comparison on this line:
https://github.com/theforeman/smart-proxy/blob/develop/modules/dhcp_isc/isc_state_changes_observer.rb#L65 can result in lease being discarded too early or too late due to difference in timezones: lease time is in UTC timezone, while Time.now returns current time in the local time zone.

History

#1 - 05/03/2017 09:03 AM - Anonymous

- Status changed from New to Rejected

The comparison works correctly -- ruby automatically converts times on both sides of the comparison to the same timezone.
