Description			
it should be possible to use a script in PRE section of kickstart instead of a static disk layout

Revision a0d9ae09 - 03/17/2010 02:14 AM - Paul Kelly

Fixes #176 - Dynamic disk layouts are supported

A disk layout that contains the string "#Dynamic" causes the partition
table entry to be written out as a script and executed as a %pre operation.
It is expected that the script leaves its results, a partition table, in
/tmp/diskpart.cfg. This is then loaded into the kikstart environemnt via
a %include directive.
