Description

yum fails with:

http://yum.theforeman.org/releases/1.0/el5/x86_64/repodata/e9674ebe7cce825f6764827e00cc2fd7aea3dc0a92eb29e9fc28a18bf1883482-primary.sqlite.bz2: [Errno -3] Error performing checksum

can you switch to

`createrepo --checksum "sha"`

which will calculate sha1?

History

#1 - 07/30/2012 01:34 PM - Sam Kottler

I can't reproduce this. Can you try running "yum clean all" and then "yum check-update" and see if that fixes the issue. I've seen something like this before caused by the HTTP caching mechanism in yum (which you can disable in /etc/yum.conf if required).

#2 - 11/19/2012 03:23 PM - Siert Z.

- File log.txt added

Indeed, this could be related to yum caches as Sam pointed.

On a clean host I can't reproduce the error. I just bootstrapped a clean EL5 (x86_64) machine and installed the foreman, puppetlabs and EPEL yum repo's:

```
rpm -ivh http://yum.theforeman.org/releases/1.0/el5/foreman-release.rpm
rpm -ivh http://yum.puppetlabs.com/el/5Server/products/x86_64/puppetlabs-release-5-6.noarch.rpm
rpm -ivh http://mirror.i3d.net/pub/fedora-epel/5/i386/epel-release-5-4.noarch.rpm
```

Then yum installed foreman without having any issues (see log).

IMO this call can be closed, unless the reporter is still facing the issue and willing to send more output/details.

#3 - 11/19/2012 03:23 PM - Siert Z.

#4 - 11/19/2012 03:25 PM - konrad rzentarzewski

since that time we've migrated to local repository, where we generate indices ourselves. so, unfortunately, i can't replicate it anymore.

#5 - 01/02/2013 09:04 AM - Sam Kottler

- Status changed from New to Feedback

The repodata for 1.1RC3 and later is generated using --checksum sha, but I'm going to move this to feedback until the new packages and associated repodata are in the stable repo.

#6 - 07/03/2013 09:23 AM - Dominic Cleal

- Status changed from Feedback to Closed
