Pull request:	https://github.com/theforeman/foreman/pull/4505	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1226017

Description of problem:

When something disrupts an upload of a foreman debug file, script still says it is successful, even when it isn't.

Version-Release number of selected component (if applicable):

snap 6 RHEL7

How reproducible:

Steps to Reproduce:

1. foreman-debug -g -v -a -d /tmp/test
2. view results
- 3.

Actual results:

A debug directory has been created: /tmp/test

You may want to upload the tarball to our public server via rsync. There is a write only directory (readable only by Foreman core developers) for that. Note the rsync transmission is UNENCRYPTED:

```
rsync /tmp/test.tar.xz rsync://theforeman.org/debug-incoming
```

Do you want to do this now? [y/N] y

Uploading...

```
rsync: link_stat "/tmp/test.tar.xz" failed: No such file or directory (2)
```

```
rsync error: some files/attrs were not transferred (see previous errors) (code 23) at main.c(1052) [sender=3.0.9]
```

The tarball has been uploaded, please contact us on mailing list or IRC.

Expected results:

If there is a failure in send, it should not says "The tarball has been uploaded".

Steps to Reproduce:

1. `foreman-debug -g -v -a -d /tmp/test`

Note that this issue may be replicated by removing `-a` and adding `-u` option, eg:

```
foreman-debug -g -v -u -d /tmp/test
```

#2 - 05/04/2017 09:51 PM - The Foreman Bot

- Status changed from *New* to *Ready For Testing*

- Pull request <https://github.com/theforeman/foreman/pull/4505> added

#3 - 05/08/2017 11:01 AM - Anonymous

- Status changed from *Ready For Testing* to *Closed*

- % Done changed from 0 to 100

Applied in changeset [9ccdc15e3b8b079df19b043aed07aa116c2a1669](#).
