Description	
Hello,	
I met this error very often in production.log. It seems to have no effect on reports view. I'm using foreman 1.14-RC1 with foreman_chef .0.4.0.

Could you help me to solve this error?

Do you have any more reports from the same host arriving at almost the same time in the logs?

The error message suggests there is already a report with an identical "reported_at" timestamp for this host. It's likely that either the host is submitting many reports at the same time, or the timestamp isn't being filled in at all.

Hello Dominic,

I've check nodes config, there is configuration doublon.
So you're right, two report of same node was sent at the same time.
I'll fix that problem on node config.

Thanks for your help! Sorry for inconvenience.
