

Foreman - Bug #1783

Default template set generates incorrect snippet names if snippet name uses underscore

07/26/2012 06:38 PM - David Swift

Status:	Closed	
Priority:	Normal	
Assignee:	Ohad Levy	
Category:	DB migrations	
Target version:	1.0.1	
Difficulty:	easy	Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:		
Description		
If a snippet file is named '_http_proxy.erb', the name generated by the migration in the database will be 'proxy' instead of 'http_proxy'.		
This can cause some really hard to track down errors if you use snippets.
