

Foreman - Bug #17855

[Image based Provisioning] Template association does not reflect correctly

12/27/2016 06:50 AM - Shimon Shtein

Status:	Closed	
Priority:	Normal	
Assignee:	Shimon Shtein	
Category:	Compute resources - oVirt	
Target version:	1.14.1	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:	1350160	Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/4140	
Description		
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1350160		
Description of problem: While performing the image based provisioning, If we change the image multiple times than associated template [under Virtual Machine ---> Template] does not change accordingly.		
Version-Release number of selected component (if applicable): 6.2 Beta 2		
How reproducible:		
Compute Resource : RHEV		
Select the provisioning method as the `Image Based`. --> select any image --> check the Template field [Virtual Machine ---> Template] --> Now change the image --> check the Template section, it still shows the old template association		
Expected results: Should have reflected the correct template association

Revision 0c78cd75 - 01/03/2017 11:11 AM - Shimon Shtein

Fixes #17855 - reflect changes to template on image selection

In oVirt images are based on templates, so when an image is selected on operating system tab, the template field on compute resource tab should change accordingly.

Revision a1fde7ca - 01/30/2017 11:02 AM - Shimon Shtein

Fixes #17855 - reflect changes to template on image selection

In oVirt images are based on templates, so when an image is selected on operating system tab, the template field on compute resource tab should change accordingly.
