Foreman - Bug #1787

Duplicate title in host view

07/27/2012 10:38 AM - Andy Taylor

Status:	Rejected

Pull request:			

Description

If you view a host like so:

http://foremanurl/hosts/example.domain.com

The <title> shows two hostnames, e.g.

example.domain.comexample.domain.com

This only occurs for hosts created with Foreman - if the host was created manually and then imported into Foreman, the title shows correctly.
