

Installer - Feature #17927

Use /sbin/nologin instead of /bin/false

01/04/2017 10:34 AM - Jason Nance

Bugzilla link:	Red Hat JIRA:
Pull request:	
Description I'd like to request that /sbin/nologin be used as the "no shell" instead of /bin/false for the foreman and foreman-proxy users (and for any other service accounts created by TFM).	

History

#1 - 01/04/2017 10:35 AM - Dominic Cleal

- Project changed from Foreman to Installer

- Category set to Foreman modules

Note that Foreman RPMs already use /sbin/nologin, but the installer's user resources all default to /bin/false causing it to change.

#2 - 01/04/2017 10:44 AM - Ewoud Kohl van Wijngaarden

This was changed in https://github.com/theforeman/puppet-foreman_proxy/commit/59c90d4711862c05fc8b24f18baa1ad9de168e86 for better compatibility. I suppose we should parametrize this.
