Foreman - Bug #17991
Javascript notify() function should not require a <p> element

01/09/2017 12:27 PM - Walden Raines

Description

This works:

```
notify("<p>Test</p>", "danger");
```

This doesn't:

```
notify("<p>Test</p>", "danger");
```

I would expect the latter to work.

Should read:

This works:

```
notify("<p>Test</p>", "danger");
```

This doesn't:

```
notify("Test", "danger");
```
