Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/4167		

Description
The ldap logger tries to call payload[:bind].status but it might not be defined if the bind goes wrong. This causes a 500 instead of logging the status of the bind. We should display payload[:bind] and only .status if it's available.

Revision 7447d046 - 01/10/2017 09:18 AM - Daniel Lobato Garcia

Fixes #17998 - Only print LDAP bind status if available

The ldap logger tries to call payload[:bind].status but it might not be
defined if the bind goes wrong in some LDAP sources.

This causes a 500 instead of logging the status of the bind. We should
only display payload[:bind].status if it's available.

Revision 1040ff65 - 01/30/2017 11:09 AM - Daniel Lobato Garcia

Fixes #17998 - Only print LDAP bind status if available

The ldap logger tries to call payload[:bind].status but it might not be
defined if the bind goes wrong in some LDAP sources.

This causes a 500 instead of logging the status of the bind. We should
only display payload[:bind].status if it's available.
