

Foreman - Bug #18002

When creating new VM on Openstack, the `availability_zone` parameter should be deleted if empty ("no preference")

01/10/2017 06:13 AM - Imri Zvik

Status: New	
Priority: Normal	
Assignee: Imri Zvik	
Category: Compute resources - OpenStack	
Target version:	
Difficulty: trivial	Fixed in Releases:
Triaged:	Found in Releases: 1.13.3

Pull request:	
Description	
<p>In Liberty, choosing "No preference" results the following error: 2017-01-10 05:01:15 fa056689 [app] [W] Failed to create a compute CR_Openstack (OpenStack) instance new-host-test: Invalid input for field/attribute <code>availability_zone</code>. Value: . u" is too short RuntimeError: Invalid input for field/attribute <code>availability_zone</code>. Value: . u" is too short /usr/share/foreman/app/models/compute_resources/foreman/model/openstack.rb:139:in `rescue in create_vm' /usr/share/foreman/app/models/compute_resources/foreman/model/openstack.rb:122:in `create_vm'</p> <p>The solution is quite simple - something along the lines of: <code>args.delete(:availability_zone) if args[:availability_zone].empty?</code></p> <p>We will open a PR for this</p>
