

## Katello - Feature #18022

### Need ability to disable sync for single repository instead of entire product

01/11/2017 04:16 AM - Daniel Lobato Garcia

<b>Status:</b> New

<b>Bugzilla link:</b> 1223056	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1223056">https://bugzilla.redhat.com/show_bug.cgi?id=1223056</a>	
Description of problem: Products are automatically generated with many sub repositories. Sync schedules should be set on a per repo basis so some content could be synced less often or only manually.	
Version-Release number of selected component (if applicable): 6.1	
How reproducible: Always	
Steps to Reproduce: 1. open a product with a sync schedule and view the repos for that product 2. change the sync schedule on that repo on the details tab 3. change reflect the entire product, not just that repo	
Actual results: Sync schedule is for the product not each repo	
Expected results: individual repos should be allowed to have different sync schedules.
