Foreman - Bug #18044

Add ability to configure time period for which a trend is recorded

Description

I can't find a way to configure my foreman instance to keep trends data for more than 30 days. Is it possible ? And if not, could it be configurable ?

Thanks for this. It is indeed what I was looking for.

If I set it to 365 days, it works well... but the dropdown is rather unusable. It would be nice for it to show a selection of time periods (last 7 days, last month, last 3 months, last year), should I open a new issue for that ?
