<b>Description</b>		
<p>i use uuid for certnames and do not use the provisioning feature of foreman.</p> <p>I run hosts_and_facts from cron to populate my db and it would be nice to use the fqdn fact as the hosts.name rather than the uuid that i am getting now.</p> <p>it probably make sense to support any configure fact and fall back to certname if undefined.</p> <p>thanks</p>
