

Smart Proxy - Bug #1806

puppet 2.6 depreciates puppetca

08/02/2012 04:10 PM - Corey Osman

Status: Duplicate	
Priority: Normal	
Assignee:	
Category: API	
Target version: Bug scrub	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>puppetca used to be the only way to list certificates. Since 2.6 puppetca still exists but shows a depreciation warning instead of listing certs.</p> <p>We need to detect which puppet version is being used and then if >2.6 use puppet cert --list instead of trying puppetca --list.</p> <p>Otherwise I have to remove the puppetca binary so foreman-proxy doesn't find it.</p> <pre>W, [2012-08-02T15:55:52.908070 #9377] WARN -- : Failed to run puppetca: E, [2012-08-02T15:55:52.908539 #9377] ERROR -- : Failed to list certificates: Execution of puppetca failed, check log files D, [2012-08-02T16:04:59.853686 #9377] DEBUG -- : Found puppetca at /usr/bin/puppetca D, [2012-08-02T16:04:59.853943 #9377] DEBUG -- : Found sudo at /usr/bin/sudo D, [2012-08-02T16:04:59.854022 #9377] DEBUG -- : Executing /usr/bin/sudo -S /usr/bin/puppetca --list --all W, [2012-08-02T16:04:59.922206 #9377] WARN -- : Failed to run puppetca: E, [2012-08-02T16:04:59.922678 #9377] ERROR -- : Failed to list certificates: Execution of puppetca failed, check log fil</pre>

History

#1 - 08/26/2012 04:10 AM - Ohad Levy

which version of puppet is broken? 2.6 works fine, 2.7 as well

#2 - 08/28/2012 04:37 AM - Corey Osman

I actually have a fix for this. Will send the pull request soon.
