

Foreman - Bug #18107

Interface's compute attributes display possibly outdated values

01/17/2017 07:38 AM - Timo Goebel

Pull request:	
Description When editing a host, the compute_attributes for the vm are loaded from fog but the interface's compute_attributes are displayed from foreman's db. When the vm is edited outside of Foreman, the displayed information is incorrect. As a user, i cannot change these attributes as updating a vm is not possible with most compute providers.
