

Katello - Bug #18169

docker tags UI page not showing correct tags based upon permissions

01/19/2017 09:03 PM - Thomas McKay

Status: New	
Priority: Normal	
Assignee:	
Category: Container	
Target version: Katello Backlog	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Below is the 'hammer csv roles --export' for a role I've created.	
The "Docker Tags" page is listing tags from repositories outside the scope of the user's permission (showing 148 when only 3 should be visible).	
<pre>Name,Resource,Search,Permissions,Organizations,Locations Production Docker,Katello::KTEnvironment,name = Production,view_lifecycle_environments,Example Corporation,"" Production Docker,Katello::ContentView,"name = ""Red Hat Container Catalog""",view_content_views,Example Corporation,"" Production Docker,Katello::Product,"name = ""Red Hat Container Catalog""",view_products,Example Corporation,""</pre>
