<b>Description</b> I've just installed Foreman 1.0.1 using the RHEL6 rpm's and imported data from a beta version of Foreman 1. This is the first time I've attempted to create an ec2 compute resource. The problem is that when I try and create a compute resource I get a 500 server error. All debug output can be found on <a href="https://gist.github.com/3373027">https://gist.github.com/3373027</a>	

#### History

**#1 - 09/03/2012 12:40 AM - Sam Kottler**

- Target version deleted (1.1)

There isn't a proposed fix here, so I'm untagging the 1.1 release.

**#2 - 09/03/2012 01:47 AM - Ohad Levy**

- Status changed from New to Need more information

this seems like you simply did not migrate your db.

**#3 - 09/26/2014 07:13 AM - Dominic Cleal**

- Category changed from Compute resources to Compute resources - EC2

**#4 - 02/29/2016 03:07 AM - Tomer Brisker**

- Description updated

- Status changed from Need more information to Rejected

Looks like missing migration some 3 years ago. Closing.
