Foreman - Bug #18260

Choose different org will result in the same org's host number change in organizations page

01/26/2017 10:23 AM - Daniel Lobato Garcia

Status:	Closed		
Priority:	Normal		
Assignee:	Daniel Lobato Garcia		
Category:	Organizations and Locations		
Target version:	1.14.1		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1415025	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/4234		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1415025
Description of problem:
In organizations page, when you select a org, the other org's host number is wrong.

Version-Release number of selected component (if applicable):
Satellite6.2.7-sp2
candlepin-0.9.54.15-1.el7.noarch
foreman-1.11.0.65-1.el7sat.noarch
katello-3.0.0-15.el7sat.noarch

How reproducible:
Always

Steps to Reproduce:
1. In satellite webUI, Create a new org named org1.
2. Registered 7 hosts to org1, make sure no host on Default_organization.
3. Go to "Management organization", choose org1, it's correct to show org1's host number is 7, please see screenshot org1.jpeg.
4. Go to "Management organization", choose Default_organization, check the org1's host number.

Actual results:
It will show org1's host number is 0. please see screenshot default_org.jpeg

Expected results:
No matter what org is choosen in organization page, the host's number in the same org shouldn't change. the host's number in org1 should always 7.

Revision cc81d993 - 01/30/2017 10:02 AM - Daniel Lobato Garcia

Fixes #18260 - Display proper organizations count on table

If the user is scoped to taxonomy "A", "Host.count" will only return
hosts in that taxonomy. That is correct. However there is a usecase
where we want to display the hosts count regardless of the current
taxonomy.

The table for locations and organizations was showing the "Host.count"
scoped to the current taxonomy, so it would show 0 everywhere but in the
current taxonomy.

The fix is to make the helper aware of this issue, and show the unscoped
Host.count when displaying the organizations/locations table
