Foreman - Feature #18336

Set correct-er Timezone data for host graphs.

02/01/2017 05:17 AM - Alexander Olofsson

Description

Currently the runtime and event graphs for host display all the time points in UTC, regardless of user settings.

Adding the following patch has made it a bit more logical - according to our users;

```
--- a/app/assets/javascripts/charts.js
+++ b/app/assets/javascripts/charts.js
@@ -165,7 +165,8 @@ function flot_time_chart(target, data, legendOptions){
     xaxis: {
       mode: "time",
       axisLabel: target.data('xaxis-label'),
-      tickLength: 0 // hide gridlines
+      tickLength: 0, // hide gridlines
+      timezone: "browser"
```

Perhaps a possibility could be to pass the timezone chosen by the current user into the charting code?
